

1. We are still trying to figure out how to run the prototype source code as the “Makefile” seems to report errors. If possible, can we have a compiled version or a executable file?
2. We think the workload is fairly manageable at this stage, so we don’t need to recruit more people to our team for now.
3. We started a GitHub repository named “grtk”, we are expecting to use GitHub as version control and contribution tool. Name of the repository can be changed anytime.
  - Link: <https://github.com/akaTiger/grtk>
4. We plan to start on GUI and file I/O first. Still deciding what libraries we should use for data visualization.
